DESCRIPTION

The **I42 L** Compact Fluorescent Emergency Ballast Kit is designed to allow shallow or unusually shaped fixtures (such as wall packs, sconces, and recessed stair fixtures) to be configured for normal and emergency operation. The unit consists of an open circuit board assembly and battery pack, which is offered in three profile options. In the event of a power failure, the **I42 L** switches to the emergency mode and operates **one or two** of the existing lamps for **90 minutes**. The **I42 L** can be used with most 10W-42W twin, triple, quad tube, 2D and straight **4-pin** compact fluorescent lamps and 18W-36W long compacts, with a total initial output of up to **650 lumens** for one or two lamps. The **I42 L** utilizes **AC output to ensure compatibility with new lamp technologies**, and features lamp selector leads for optimizing light output for designated lamp types. The **I42 L** is a U.L. Recognized Component for factory installation only.
