Rated Life         40,000 hours           Housing         Aluminum           Socket         E26           Beam Spread         40°,25°	Equivalent Source Standard	50W Incandescent
Socket E26	Rated Life	40,000 hours
°°	Housing	Aluminum
Beam Spread 40°,25°	Socket	E26
	Beam Spread	40°,25°
Flood, Narrow Flood	Flood, Narrow Flood	
<b>Operating Temperature</b> -20°C to +40°C	Operating Temperature	-20°C to +40°C
<b>E26 MOL</b> 2.48in, 62.99mm	E26 MOL	2.48in, 62.99mm
Voltage 120VAC	Voltage	120VAC
<b>Weight</b> 0.35lbs., 158.75g	Weight	0.35lbs., 158.75g
Power Factor 2.9	Power Factor	≥.9
Warranty 5 year limited	Warranty	5 year limited

# PAR<sub>20</sub>

# Benefits

- Higher efficacy offers more light output while consuming less power.
- Only 8W Requires 80% less power than comparable 50W incandescent lamps.
- Dimmable to 10% on most dimmers
- Four available color temperatures and two available beam angles offer a multitude of combinations to fit almost any need or application.
- Suitable for damp locations.
- Maintenance free operation, lasts up to 40x longer than Incandescent lighting.
- RoHS Compliant Contains no Mercury or Lead.

Specifications supplied are nominal. Please refer to the DOE's Lighting Facts Tolerance Guidelines. 

Values are nominal, advances from further innovation, specifications are subject to change.

### Recommended number of lamps per 600 watt dimmer<sup>2</sup>

While an LED lamp may draw as few as 10 watts continuously, it could have an in-rush watts continuously, it could nave an in-iosi current spike (maximum, instantaneous input) which may limit the number of lamps you can install on one dimmer. The following table provides a recommended maximum quantity of LS lamps that should be used on a typical approved 600W dimmer.

Ex: Max number of A19 60W lamps, with an 80W in-rush, that can be used on 600W dimmer = 7

LS LED Lamp	Lamp In-Rush Current Equivalent	Max # of Lamps per 600W Dimmer

- Specifications supplied are nominal. Please refer to the DOE's Lighting Facts Tolerance Guidelines.

  1 Dimmer compatibility list indicates those dimmers that have been tested and operate properly under normal conditions. In certain cases, approved dimmers are offered in higher wattage varieties that are the compiliate and allow the installation. that are also compliant and allow the installation of additional lamps if kept within the maximum inrush current equivalent provided in the table. Each application is unique and various factors such as load, common neutrals or other electrical products on the circuit can, in certain instances, cause variance in system performance. Consult dimS1ng system manufacturer for additional
- support in operation.

  2 Values are nominal, advances from further innovation, specifications are subject to change.

Visit www.lsgc.com/energystar for list of ENERGY STAR qualified lamps.

#### **CAUTIONS**

THIS DEVICE IS NOT INTENDED FOR USE WITH EMERGENCY EXITS. NOT FOR USE IN TOTALLY ENCLOSED FIXTURES. TURN OFF POWER BEFORE INSPECTION, INSTALLATION, OR REMOVAL. DO NOT OPEN - NO USER SERVICEABLE PARTS INSIDE. Suitable for damp locations. Use only on 120 volt, 60 Hz circuits. This device complies with part 15 of the FCC rules and has been tested and found to comply with the limits for a class B digital device. This Class B digital apparatus complies with Canadian ICES-003. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. Any changes or modifications not expressly approved by the manufacturer could void the user's authority to operate the equipment. For use with light dimmers. Compatible with most dimmer switches. For complete details on our warranty and dimmer compatibility please visit www.lsgc.com/warranties and www.lsgc.com/dimmer.
