See back page for above referenced model configurations

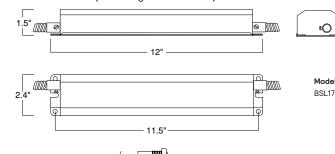

# **Benefits:**

.

- Listed for field or factory installation UL 924 and CSA C22.2 No. 141 Emergency Lighting Compliant
- Smart Charger Technology for low energy consumption
- Meets CEC Title 20 (California Energy Commission) efficiency standards
  - Class 2 output UL 1310 Certified, CSA 22.2 No 223-M91 compliant
- Controlled power for predictable discharge
- Emergency mode initial lumen output of up to 975 lumens
- 15-50 VDC for wide range of LED loads
- Universal input (120 through 277 VAC, 50/60 Hz)
- RoHS Compliant

# Dimensions

12.0" x 2.4" x 1.5" (mounting center - 11.5")

Model shown: BSL17CC2T1U / 913702454801

# **Specifications**

#### **UL** Listed

Listed to UL924 and CSA 22.2 No. 141 For Field or Factory Installation (Indoor and Damp)

#### Illumination Time

90 Minutes

# Full Warranty

5 Years (NOT pro-rata)

#### Universal Input Voltage 120-277 VAC, 60 Hz

AC Input Power

# 3.0 (Maximum)

Output Voltage 15.0 - 50.0 VDC

Output Power 7.5 W (Maximum),

# Test Switch/Charging Indicator Light

2 W - ITS (2-Wire illuminated test switch)

# Battery

High-Temperature, Maintenance-Free Nickel-Cadmium Battery

7- to 10-Year Life Expectancy

# Recharge Time

24 Hours

# Temperature Rating

Ambient : 0°C to +55°C (32°F to 131°F) Case: Tc (max): 65°C

# Dimensions

12.0" x 2.4" x 1.5" (304 mm x 60 mm x 38 mm) Mounting Center 11.5" (292 mm)

#### Weight

4.3 lbs. (1.95 kg)

# **Application**

The BSL17C-C2 is UL Listed for factory or field installation and allows the same LED luminaire to be used for normal and emergency operation. The BSL17C-C2 emergency LED driver works in conjunction with an AC LED driver that has an output current not to exceed 3.0 A, to convert new or existing LED fixtures into emergency lighting. The emergency driver consists of a high-temperature nickel-cadmium battery, charger and electronic circuitry in one compact case. The BSL17C-C2 can be used with an LED lighting load of up to 7.5 Watts. If used in an emergency-only fixture, no AC driver is necessary. The BSL17C-C2 is suitable for indoor and damp locations and for sealed & gasketed fixtures, including fixtures rated for wet locations. Neither the BSL17-C2 nor the BSL17C-C2 is suitable for air handling heated air outlets and wet or hazardous locations. For more information about specific LED and AC driver compatibility, please call the factory.

# Operation

When AC power fails, the BSL17C-C2 immediately switches to the emergency mode, operating the LEDs at a reduced lumen output for a minimum of 90 minutes. When AC power is restored, the emergency driver automatically returns to the charging mode.

# Installation

The BSL17C-C2 does not affect normal fixture operation and may be used with either a switched or unswitched fixture. If a switched fixture is used, an unswitched hot lead must be connected to the emergency driver. The emergency driver must be fed from the same branch circuit as the AC driver. The BSL17C-C2 may be installed on top of the fixture and the BSL17-C2 may be installed on top of or inside the fixture. Installation is not recommended with fixtures where the ambient temperature may fall below 0° C.

# **Code Compliance**

For detailed information regarding standards and code compliance for emergency lighting see product page or the Codes and Standards section on the web site.

# **Emergency Illumination**

The BSL17C-C2 operates an LED load of up to 7.5 Watts.

## **Specification**

Emergency lighting shall be provided by using an LED fixture equipped with a Bodine BSL17C-C2 emergency driver. This emergency driver shall consist of a high-temperature, maintenance-free nickel-cadmium battery, charger and electronic circuitry

Optional Configurations (with order numbers)

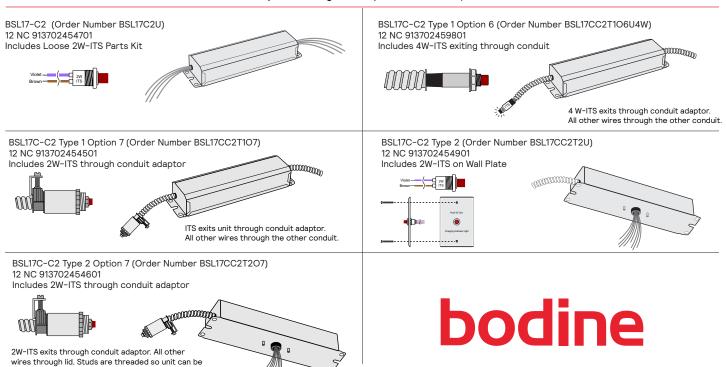

contained in one 12" x 2 3/8" x 1 1/2" metal case. The BSL17C-C2 comes with an illuminated test switch (ITS) to monitor charger and battery and installation hardware shall be provided. The emergency driver shall be capable of delivering up to 7.5 Watts to an LED load (15-50VDC) for a minimum of 90 minutes. The BSL17C-C2 shall have a 15.0 Watt-hour battery capacity and shall comply with emergency standards set forth by the current NEC. This device complies with Part 15 of the FCC Rules and meets CEC Title 20 (California Energy Commission) efficiency standards. The emergency driver shall be UL Listed for field or factory installation.

# Installation Options and Ordering Codes

The BSL17C-C2 model can be ordered in several mounting configurations and test switch/LED kits. Please see the ordering codes below to determine which configuration best meet your requirements.

# Warranty

Model BSL17C-C2 is warranted for five (5) full years from date of manufacture. Please see detailed warranty information on our web site.
