**Applications**

- General Lighting
- Recessed Cans
- Wall Sconces

**Product Description**

PFT plug-in compact fluorescent light bulbs are equipped with specialized pin bases that are specific to the CFL's wattage to ensure that it is matched up with a proper fixture containing a compatible ballast. Because these special pin bases are only manufactured on energy-saving light bulbs, PFT CFLs are a great retrofit option for utility rebates because incandescent bulbs cannot be used in these specialized fixtures.

This 13-watt PFT CFL replaces a 60-watt incandescent light bulb and saves up to 75% on energy costs. It has a warm 2700K color temperature that is similar to incandescent light and must be used in a fixture that is compatible with its GX23 base.
