INVENTRONICS

Features

- Compact Metal Case with Excellent Thermal Performance

- Full Power at Wide Output Current Range (Constant Power)

- Adjustable Output Current (AOC) with Programmability

- Isolated 1-5V/1-10V/10V PWM/3-Timer-Modes Dimmable

- Output Lumen Compensation

- Input Surge Protection: DM 6kV, CM 10kV

- All-Around Protection: OVP, SCP, OTP

- IP66 / IP67 and UL Dry / Damp / Wet Location

- Class 2 & SELV Output

- TYPE HL, for use in a Class I, Division 2 hazardous (Classified) location

- 5 Years Warranty

Description

The *EUM-075SxxxDx* series is a 75W, constant-current, programmable and IP66/IP67 rated LED driver that operates from 90-305Vac input with excellent power factor. It is created for many lighting applications including high bay, tunnel and roadway lights, etc. The high efficiency of these drivers and compact metal case enables them to run cooler, significantly improving reliability and extending product life. To ensure trouble-free operation, protection is provided against input surge, output over voltage, short circuit, and over temperature.

Notes: (1) Output current range with constant power at 75W
    (2) Certified input voltage range: UL, FCC 100-277Vac; otherwise 100-240Vac.
    (3) Measured at 100% load and 220Vac input (see below "General Specifications" for details).
   (4) SELV Output.
    (5) Class 2 & SELV output.
    (6) x = G are UL Recognized, ENEC and CCC, etc. models; x = T are UL Class P models; x = B are BIS models.
    (7) Only available with x = G, and only with ENEC, CE, CB and CCC certificates.

Protection Functions

| Parameter	Notes
Over Temperature Protection	Decreases output current, returning to normal after over temperature is removed.
Short Circuit Protection	Auto Recovery. No damage will occur when any output is short circuited. The output shall return to normal when the fault condition is removed.
Over Voltage Protection	Limits output voltage at no load and in case the normal voltage limit fails.

Dimming

● **1-5V Dimming**

The recommended implementation of the dimming control is provided below.

Specifications are subject to changes without notice.   *All specifications are typical at 25℃ unless otherwise stated.*

www.inventronics-co.com   Tel: 86-571-56565800   Fax: 86-571-86601139   sales@inventronics-co.com
Implementation 1: **Positive logic**

**Implementation 2**: **Negative logic**

Notes:
1. Do NOT connect Dim− to the output V− or V+, otherwise the driver will not work properly.
2. The dimmer can also be replaced by an active 1-5V voltage source signal or passive components like zener.
3. When 1-5V negative logic dimming mode and Dim+ is open, the driver will output maximum current.

● **1-10V Dimming**
The recommended implementation of the dimming control is provided below.

Implementation 3: **Positive logic**

Specifications are subject to changes without notice.   *All specifications are typical at 25℃ unless otherwise stated.*

www.inventronics-co.com   **Tel: 86-571-56565800**   **Fax: 86-571-86601139**   **sales@inventronics-co.com**
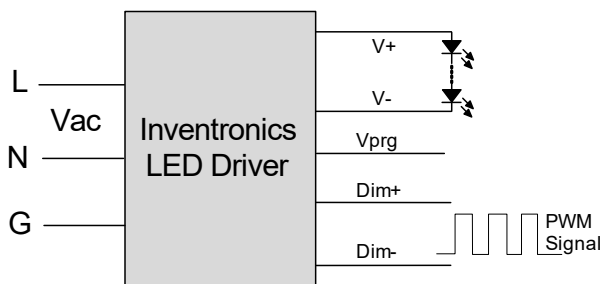

Implementation 4: Negative logic

Notes:
1. Do NOT connect Dim− to the output V− or V+, otherwise the driver will not work properly.
2. The dimmer can also be replaced by an active 1-10V voltage source signal or passive components like zener.
3. When 1-10V negative logic dimming mode and Dim+ is open, the driver will output minimum current.

● **10V PWM Dimming**

The recommended implementation of the dimming control is provided below.

Implementation 5: Positive logic

Implementation 6: Negative logic

Notes:
1. Do NOT connect Dim− to the output V− or V+, otherwise the driver will not work properly.

Specifications are subject to changes without notice.   *All specifications are typical at 25℃ unless otherwise stated.*

www.inventronics-co.com   **Tel: 86-571-56565800**   **Fax: 86-571-86601139**   **sales@inventronics-co.com**

2. When PWM negative logic dimming mode and Dim+ is open, the driver will output minimum current.

- **Time Dimming**

  Time dimming control includes 3 kinds of modes, they are Self Adapting-Midnight, Self Adapting-Percentage and Traditional Timer.
 - **Self Adapting-Midnight**: Automatically adjusts the dimming curve based on the on-time of past two days (if difference <15 minutes), assuming that the center point of the dimming curve is midnight local time.
  - **Self Adapting-Percentage**: Automatically adjusts the on-time of each step by a constant percentage = (actual on-time for the past 2 days if difference <15 min) / (programmed on-time from the dimming curve).
  - **Traditional Timer**: Follows the programmed timing curve after power on with no changes.

- **Output Lumen Compensation**

  Output Lumen Compensation (OLC) may be used to maintain constant light output over the life of the LEDs by driving them at a reduced current when new, then gradually increasing the drive current over time to counteract LED lumen degradation.
