EUM-200SxxxDT

Rev. A

Features

- Compact Metal Case with Excellent Thermal Performance
- Full Power at Wide Output Current Range (Constant Power)
- Adjustable Output Current (AOC) with Programmability
- Isolated 1-5V/1-10V/10V PWM/3-Timer-Modes Dimmable
- Output Lumen Compensation
- Input Surge Protection: DM 6kV, CM 10kV
- All-Around Protection: OVP, SCP, OTP
- IP66 / IP67 and UL Dry / Damp / Wet Location
- SELV Output
- TYPE HL, for use in a Class I, Division 2 hazardous (Classified) location
- UL Class P Type
- 5 Years Warranty

Description

The *EUM-200SxxxDT* series is a 200W, constant-current, programmable IP67 LED driver that operates from 90-305Vac input with excellent power factor. It is created for many lighting applications including high bay, high mast and roadway, etc. The high efficiency of these drivers and compact metal case enables them to run cooler, significantly improving reliability and extending product life. To ensure trouble-free operation, protection is provided against input surge, output over voltage, short circuit, and over temperature.

Models

Adjustable Output	Full-Power	Default	Input	Output	Max.	Typical	Power Factor		Model Number
Current Range	Current Range (1)	Output Current	Voltage Range(2)	Range Power		(-)		220Vac	(5)
70-1050mA	700-1050mA	700 mA	90~305 Vac/ 127~300 Vdc	95~286 Vdc	200 W	93.5%	0.99	0.96	EUM-200S105DT
105-1500mA	1050-1500mA	1050 mA	90~305 Vac/ 127~300 Vdc	67~190 Vdc	200 W	93.0%	0.99	0.96	EUM-200S150DT
180-2800mA	1800-2800mA	2100 mA	90~305 Vac/ 127~300 Vdc		200 W	92.5%	0.99	0.96	EUM-200S280DT ⁽⁴⁾
350-5600mA	3500-5600mA	4200 mA	90~305 Vac/ 127~300 Vdc	$18 \sim 67 Mac$	200 W	92.0%	0.99	0.96	EUM-200S560DT ⁽⁴⁾

Notes: (1) Output current range with constant power at 200W

(2) Certified input voltage range: UL, FCC 100-277Vac; otherwise 100-240Vac.

(3) Measured at 100% load and 220Vac input (see below "General Specifications" for details).

(4) SELV Output.

(5) All the models are certificated to KS, except EUM-200S105DT.

Protection Functions

Parameter	Notes
Over Temperature Protection	Decreases output current, returning to normal after over temperature is removed.
Short Circuit Protection	Auto Recovery. No damage will occur when any output is short circuited. The output shall return to normal when the fault condition is removed.
Over Voltage Protection	Limits output voltage at no load and in case the normal voltage limit fails.

Dimming

• 1-5V Dimming

The recommended implementation of the dimming control is provided below.

Implementation 1: Positive logic

Rev. A

200W Programmable IP67 Driver

Implementation 2: Negative logic

Notes:

- 1. The dimmer can also be replaced by an active 1-5V voltage source signal or passive components like resistors and zener.
- 2. If 1-5V dimming is not used, Dim + should be open.
- 3. When 1-5V negative logic dimming mode and Dim+ is open, the driver will output maximum current.

• 1-10V Dimming

The recommended implementation of the dimming control is provided below.

Implementation 3: Positive logic

Implementation 4: Negative logic

EUM-200SxxxDT

Rev. A

Notes:

- 1. The dimmer can also be replaced by an active 1-10V voltage source signal or passive components like resistors and zener.
- 2 If 1-10V dimming is not used. Dim + should be open.
- When 1-10V negative logic dimming mode and Dim+ is open, the driver will output minimum current. 3.

10V PWM Dimming •

The recommended implementation of the dimming control is provided below.

Implementation 5: Positive logic

Implementation 6: Negative logic

Notes:

- 1. If PWM dimming is not used, Dim + should be open.
- When PWM negative logic dimming mode and Dim+ is open, the driver will output minimum current. 2.

Time Dimming

Time dimming control includes 3 kinds of modes, they are Self Adapting-Midnight, Self Adapting-Percentage and Traditional Timer.

- · Self Adapting-Midnight: Automatically adjusts the dimming curve based on the on-time of past two days (if difference <15 minutes), assuming that the center point of the dimming curve is midnight local time.
- Self Adapting-Percentage: Automatically adjusts the on-time of each step by a constant percentage = (actual on-time for the past 2 days if difference <15 min) / (programmed on-time from the dimming curve).
- Traditional Timer: Follows the programmed timing curve after power on with no changes.

Output Lumen Compensation

Output Lumen Compensation (OLC) may be used to maintain constant light output over the life of the LEDs by driving them at a reduced current when new, then gradually increasing the drive current over time to counteract LED lumen degradation.

Programming Connection Diagram

Note: The driver does not need to be powered on during the programming process.

Please refer to **PRG-MUL2** (Programmer) datasheet for details.
