## HATCH Features

- Recommended for regularly replaced applications.
- Affordable option for applications replaced less frequently.
- Maximum case temperature of 90 C which is beneficial when used in recessed fixture applications.
- Keeps mounting simple with button and side push in connectors, AND includes all materials needed (bottom lead, side lead adapter plate, mounting feet).
- Senses if the lamp is about to fail, then automatically powers down so there is no damage to the lamp or system.
- Made for institutional, commercial and office use.
- Color coded poke-in connectors.
- Designed to meet the most demanding power requirements.
- Low profile case.
- In most cases, THD is less than 10%.
- Program Start.

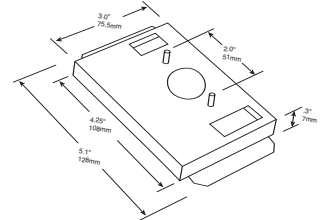

*Slide on stud mount plates are included with the SMART KIT™*

### Stud Mounting Plate Dimensions

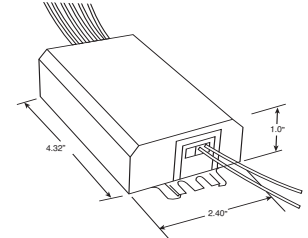

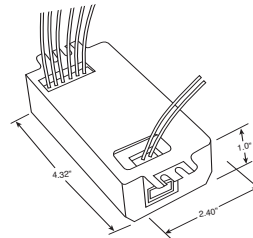

13, 18 & 26 Watt Models

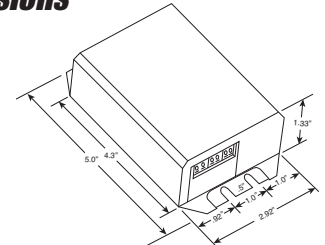

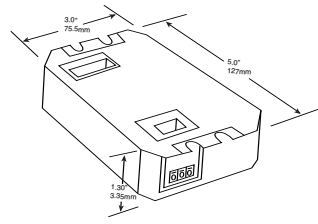

42 Watt Models

### 13, 18 & 26 Watt Dimensions

### 42 Watt Dimensions

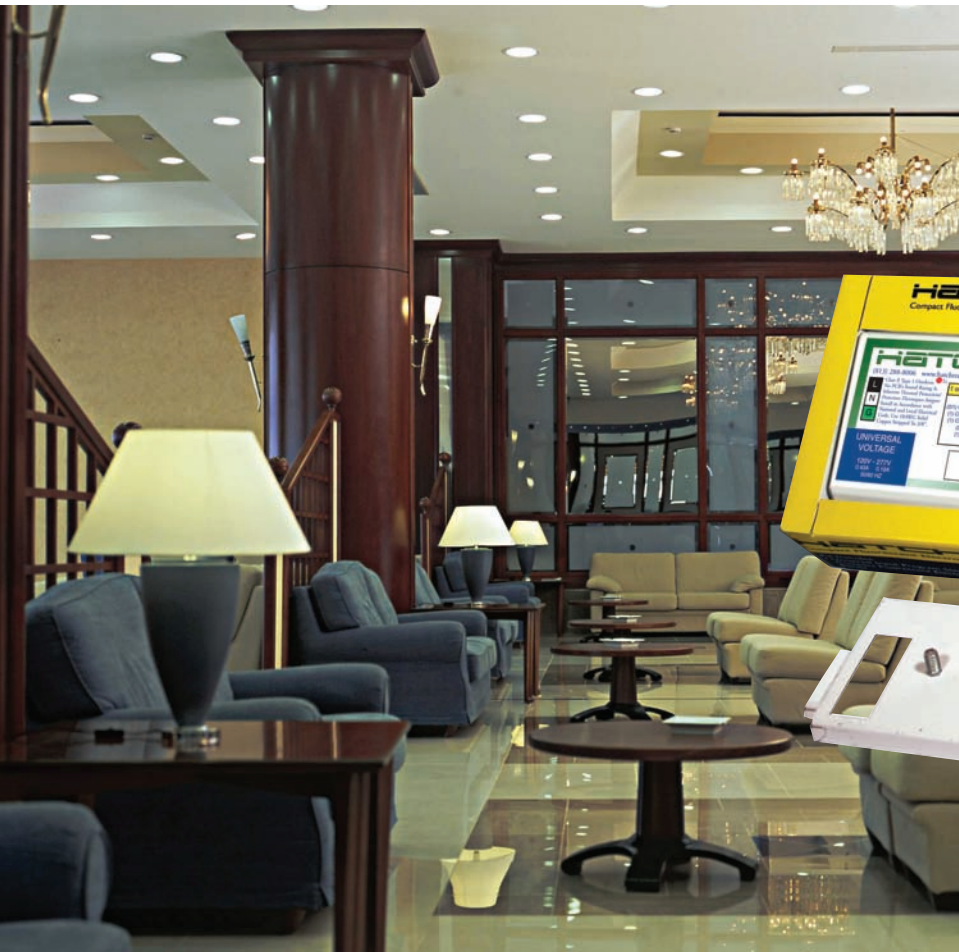

- For one or two lamps
- Slide on stud mounting plate for J-Box
- Electronic Universal CFL Ballasts
- Color coded lead wires
- Wire removal tool
- No Additional Hardware Required

# HATCH SMART KIT™

Compact Fluorescent Electronic Ballast Kit

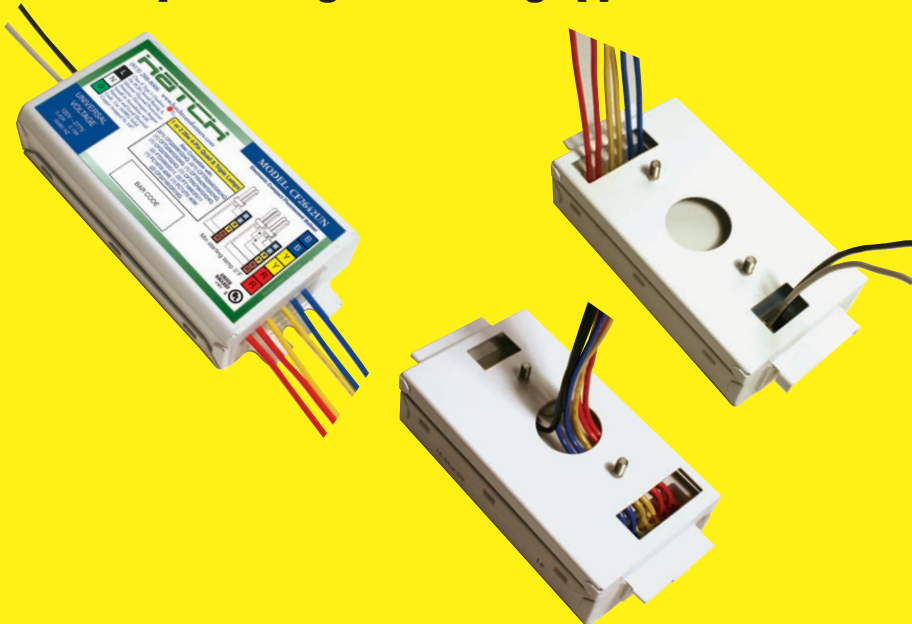

*For Quick & Easy Ballast Replacement*

**High Power Factor  
Energy Saving Design**

## Multiple Wiring & Mounting Applications

**Use Hatch Compact Fluorescent Smart Kit™ replacement ballasts for 13-42W lamps when replacing lighting fixture ballasts. They are easy to install and energy efficient.**

### For All J-Box and Fixture Mounting

- 1 Bottom Feed
- 2 Side Lead
- 3 Bottom Feed w/stud mounting plate
- 4 Bottom Center Feed w/stud mounting plate

**Programmed rapid start ballasts apply filament heat initially and delay application of sufficient open circuit voltage to start the lamps until after the filaments have been heated adequately.**
