

HATCH

10 TO 42 WATT "HR" SERIES 1-LAMP COMPACT FLUORESCENT BALLAST

**Side Lead
and Bottom Feed
Models**

Compact Fluorescent Hardwire Ballast Features:

- Auto Restart After Hot Relamp
- Deactive Lamp Protection Circuit
- Flicker Free Operation
- High Power Factor
- Low THD
- 100% Factory Tested
- High Reliability
- No Audible Noise
- True Preheat Starting
- No Starting Aid Required
- Energy Efficient
- High Frequency Operation
- Solid State
- Moisture and Shock Resistant
- No PCBs
- Bottom Feed Models Available

Environmental Specifications

Maximum Case Temperature	70°C at "T" point
Minimum Starting Temperature	-25°C
Sound Rating	A+
Operating Humidity	95% relative humidity, non-condensing
Environmental Protection	Epoxy Sealed for moisture resistance and shock vibration resistance
Safety Listing	 Class P Type 1 outdoor

Electrical/Mechanical Specifications

Input Voltage	120V 50/60 Hz 230V 50 Hz (special order) 277V 60 Hz
Color	White
Weight	HR-6.0 oz./ HR-BF-7.0 oz.
Operating Frequency	50 KHz +
Power Factor	≥ 0.99
Total Harmonic Distortion	5-13% depending on lamp/ballast combination
Deactive Lamp Protection	Yes
Auto Restart After Hot Relamp	Yes
Current Crest Factor	≤ 1.7
Open Circuit Protected	Yes
RFI Suppression	Yes
Input Leads	10 ⁵ / ₈ " 18 AWG solid 105 degree C stripped 3 ¹ / ₈ "
Output Leads	10 ⁵ / ₈ " 18 AWG solid 105 degree C stripped 3 ¹ / ₈ "

Meets ANSI 15 C62.41, ANSI C82.1 CLASS P

Built with two threaded studs, 2" on center and bottom center feed wiring, for easily replacing magnetic ballasts.

Safety Agency  US LISTED
*HR 4200 Models Does Not Have UL
