

## JD Type Halogen 100W 130V/120V Double Life Clear (E11)

JD type halogen 100W (watt) 130V (volt) bulb/lamp with E11 miniature candelabra screw base. Replacement for candelabra, chandeliers, ceiling fans, pool and spa lighting, fixtures, etc. This 130V bulb replaces and lasts longer than lower voltage rated bulbs; 130V bulb is same as 120V double life. Dimmable; dimming does not shorten bulb life. T4 bulb shape, clear or frosted quartz glass, tungsten filament, 1600 lumens, MOL (length) 2-1/2" or 65mm, color temperature 2850K; bulb life 2000 hours at 130V, longer at lower voltages. The frosted version is UV (ultra violet) block/filter/protected.

For replacing this type of bulb, the length/MOL of the old bulb typically varies from about 2-1/4" to 3" depending on the manufacturer. It is more important to match the type (JD) and base (E11).

Bulb may also be marked with "CL" for "clear lens", "F" for "frosted", "MC" for "miniature (mini) candelabra (can)
