

Designed for T-8 Lamps

Leviton's Medium Bi-Pin Low-Profile Lampholders Cat. Nos. 13651 (non-shunted) and 23651 (shunted) are dedicated only for T-8 fluorescent lamps. This prevents end-users from re-lamping in service with less efficient T-12 lamps. Designed with an extra low-profile, the lampholders make it possible to create smaller, more compact fixtures, reducing costs while adding versatility. Molded of white urea, they utilize a slide-on design for thin 20-gauge panels—the panels of choice for modern fixture design.

Cat. No. 13651: Medium Bi-Pin Twist-In Fluorescent Lampholder, dedicated for T-8 lamps only. Extra low-profile design. For use with 20 gauge panels.

Cat. No. 23651: Same as above, except with internal shunt connection for use with instant-start ballasts. Back of lampholder is stamped "S" to identify shunt and help prevent improper applications.
