## Ardco 800 replacement

**Ardco 800**

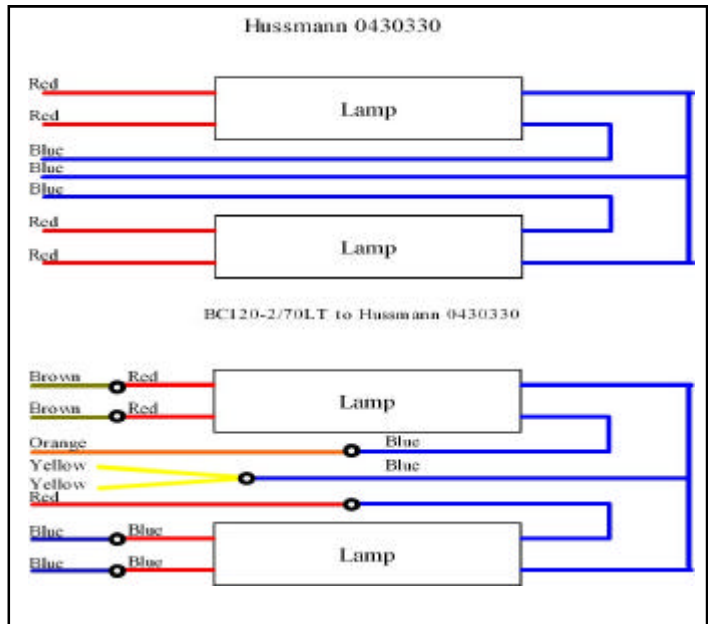

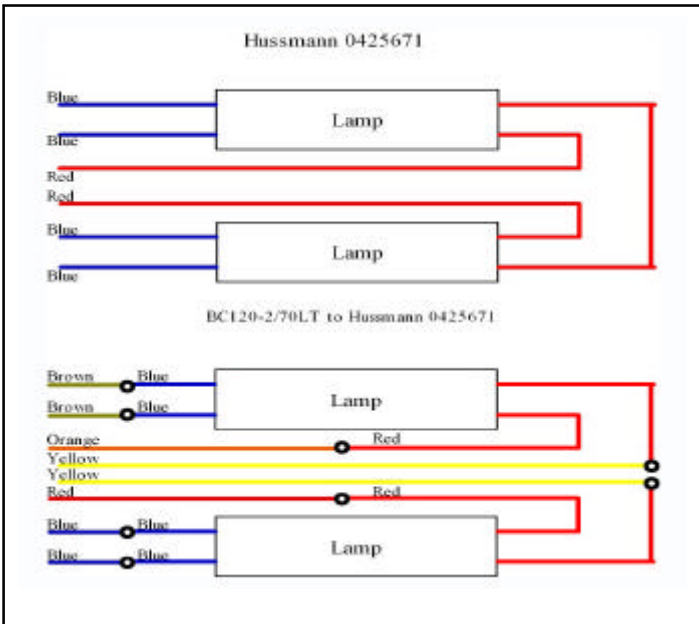

**WH5-230L**

Wiring can all be done in ballast compartment

Power must be turned off before commencing

1. Red wire that was going directly to the Ardco goes to Black on the WH5
2. Red wire that goes to lamp gets cut in two - hot side goes to White on WH5
3. The other side of the Red wire gets joined to the black that was going from the capacitor to the lamp and to the yellow on the WH5. (capacitor gets removed)
4. The two Blue wires get joined together and then to any three of the Red WH5 wires
5. Remaining Red wire gets capped off.
