

LH0635

The LH0635 BJB 26.293.6211 is a G13 medium-based, shunted* lamp holder with “flexible wings” for push fit mounting and a locator post also known as the post, stop or nib positions the socket on the fixture. The T8-T12 (G13 base) fluorescent or LED lamp holder has a rotary locking (turn and lock) insertion to keep the LED or fluorescent tubular lamps in a fixed position. The BJB 26.293.6211 is rated up to 660W-600V, is cULus listed. The BJB 26.293.6211 has bottom quick connects that allows for easy installation of wiring. Used with instant start ballasts and LED bulbs that require a shunted* lamp holder. It is made of durable polycarbonate and has a black rotor.

Dimensions 1.77 x 1.22 x 0.36
