Product Description

Micro-Brite cold cathode sign light bulbs are flashable with rapid ignition, so they can be used in flashing signs or message centers without blurring or trailing. They have a super long 25,000-hour life that drastically reduces sign maintenance and replacement costs.

This 2-watt Micro-Brite S14 light bulb has a white finish and can replace an 11-watt S14 incandescent bulb in flashing signs to provide up to 85% energy savings. It is weather-resistant and able to work in a variety of weather conditions, including rain and snow.
