

INFRARED INDUSTRIAL HALOGEN LAMP
PHILIPS IRK 14143Z/98

Lamp Wattage **2500 W** Lamp Voltage **400 V** Cap/Base **Z cap**

Dimensional drawing

Z cap modification

Description of change: from a ceramic and metal cemented to a full ceramic cemented cap
Reason for change: Environment: present solvent based cement will be replaced by water based cement
Electrical insulation: The new version is better insulated, being full ceramic, no more metal
New cap has the same outer dimensions, no consequences for the user.
Specifications remain unchanged compared to old Z cap:
- Tensile strength: 80 N (Newton, minimum)
- Torque resistance: 0.8 Nm (Newton meter, minimum)
- Insulation: 2000 V (0.5 mA maximum creeping current)
Cables remain the same for old and new version.
