

LFL Refit Kit

Refit Solutions from GE

Description

Convert your existing linear fluorescent fixture to high-efficiency LFL lighting without needing a comprehensive reinstall. The LFL Refit Kit is ideal for those seeking substantial savings and long-life products without committing to an LED lighting upgrade. Within the Refit Solutions from GE portfolio is offered one of the lowest initial costs with one of the highest total life cycle returns. It also provides excellent light distribution, low install time and high energy savings.

Each LFL Refit Kit provides everything you need to retrofit your existing LFL lighting system, including reflectors, mounting brackets and sockets.

Features

- For 2' x 4' fixtures
- White and aluminum reflectance options available
- Lamp holders available in shunted (for Instant Start ballasts) and Non-Shunted (for program Rapid Start ballasts)
- UL-approved technologies – in compliance with UL 1598 certification

LFL Refit Kit Ranking among Complete Refit Solutions Portfolio

	GOOD	BETTER	BEST
Initial Acquisition Costs			✓
Installation Time/Cost		✓	
Energy Costs		✓	
Total Life Cycle Costs			✓
Light Distribution/Aesthetics		✓	

Pair our LFL Refit Kit with our 80,000+ hour 25 watt or 28 watt SXL lamps. See spec sheets 72520 or 73501 for more information.

Savings Breakdown

Save 54% in energy costs compared to standard T8 (4-lamp) light fixtures.*

Cumulative Energy Costs

Savings calculations are based on energy costs using \$0.11 per kWh and 16 hours of daily operation.

*Two-Lamp T8 System – 4,900 Lumens,
Four-Lamp T12 System – 6,600 Lumens
