

Overview

GROW GREEN lamps emit light in the right spectrum, they are highly efficient and their low sensitivity to interference and long service life set them apart from other alternatives. And the result is a better harvest.

- Ideal for cultivation with high light demands
- High proportions of red and blue light guarantee efficient photosynthesis
- Highest output of PAR light (2100 µmol/s) promotes photosynthesis
- Lots of red light for more photosynthesis and good plant development
- Blue light for a robust, compact plant structure

Specifications

Shipping Weight	0.5 lbs.
Package Dimensions	2.5L x 2.5W x 12.8H
Units/pallet	504
Average Rated Life Hours	10000
Rated Wattage	1000
Unboxed4_Height	0.0000000000000000
Unboxed3_Length	0.0000000000000000
Unboxed1_Weight	0.0000000000000000
Unboxed2_Width	0.0000000000000000
Voltage	230
